

10 Year Summary									
1992	1993	1994	1995	1996	1997	1998	1999	2000	2001

	Q1	Q2	Q3	Q4	Average
2001					
2002	38.8				38.8

You will notice a difference in the way that the average length of stay is reported; the 1st Quarter of 2002 is the first quarter that we are requesting jurisdictions to submit their length of stay. In the past, the average length of stay was calculated using the ADP and number of bookings. As new data accumulates for the average length of stay, we will be able to determine and monitor trends for this variable.
